

## What's in it for you?

### Fast, precise measurements.

In the food sector, temperature measurements are taken every day. The only way for you to be able to thoroughly check and guarantee the quality of your products is with precise measurement. This is how you ensure compliance with the HACCP regulations. The testo 108 makes this really easy for you.

The testo 108 enables you to undertake spot check measurements in a matter of seconds. Whether this is for transport and storage of food, in restaurants, in large scale kitchens or the food service industry. If you want to measure temperature, this instrument is all you need. It will enable you to integrate temperature measurement effortlessly into your day-to-day work. And you won't need to concern yourself with the mandatory HACCP regulations.

## Order testo 108 now!

## What exactly can a Testo handle? Anything.

**testo 108** - Fast, easy and precise temperature measurement

XXX XXX/dk/Q/04.2012 Subject to change without notice.

Where can you use the testo 108?

Wherever food temperature is of relevance.

What's so special about the testo 108?

It's easy to use.

You will love working with the testo 108. Its large display and simple operation with two self-explanatory keys guarantee that even unskilled personnel can take measurements quickly and reliably.

**The key features at a glance**

- Ease of operation and use
- Waterproof instrument and probe (IP67)
- Softcase and probe included
- HACCP-compliant and certified to EN 13485
- Measurement is fast, precise and easy

The testo 108 proves its worth most notably in harsh working environments. Its Softcase (protection case) means that moisture and water pose no problem at all, and it is protected from impact damage and contamination. Once you have cleaned the probe under running water, you can store it directly in the Softcase and finish your working day relaxed.
